- Equipped with FTP/SMB/NFS server, 128MB Fast DDR memory, printer server and Raid 0/1/JBOD support
- Easy installation
- 5-Year warranty
- Accessible helpdesk
- Multilingual user manual

DUAL SATA RAID0 1/JBOD | FILE BACKUP SERVER | SAMBA/ NFS/FTP/ ITUNES/ BONJOUR | 1000MBIT LAN/ 128MB DDR | NZBGET BITTORRENT MEDIASERVER | BUILT-IN PRINTER SERVER

Sharing your documents and media has never been so fast before! Connect two internal 3.5” SATA harddisks to the Eminent EM4072 Gigashare PRO and create a high speed NAS system.

The Gigashare PRO offers you true power at gigabit speeds. Thanks to its built-in 128MB DDR memory and 1000Mbit network interface, it can serve as the centerpiece of your home network and business network. The Gigashare PRO does not only share files, it also acts as a UPnP mediaserver and downloads files using Torrents (Transmission) or Newsgroups (NZBget). The built-in printer server enables you to share your USB printer on the network.Capacity should no longer be a problem, as the Gigashare PRO offers you an internal dual-bay setup. You can mount up to 3TB of space in RAID 0/1 or JBOD setup, choosing speed or security as you please. If the internal capacity is not enough, you can always add an external storage solution to the USB port.The Gigashare PRO is provided with free (GPL) modules, including NZBget, Bittorrent, Mediaserver and MLDonkey. You can turn off your computer and let the Gigashare PRO do all the downloading. All the modules are optional, so you can choose not to install them if your Gigashare PRO is used in a business environment.

The Eminent EM4072 Gigashare PRO is the perfect solution for business users that need a secure RAID1(Mirror) storage solution, or for home users that demand optimal performance from a NAS.
